

DAY MARINGISANWA

maringisanwaday@gmail.com

PROFILE

Adaptable and self-directed individual with a practical, results-focused approach to software engineering. Quick to pick up new tools, technologies, and ways of working, and comfortable operating with minimal supervision once given clear objectives. Combines independent study with hands-on project work to deliver efficient, functional solutions.

EXPERIENCE

Youth Coding Instructor

Taught coding fundamentals to young learners, breaking down technical concepts into clear, accessible lessons and supporting hands-on practice.

EDUCATION

Software Engineering — Uncommon.org

2026 – Present (*in progress*)

SKILLS

- JavaScript (fundamentals through intermediate: functions, loops, arrays, DOM manipulation)
- React & Vite — built Forge, a workout tracking application with multiple functional tabs
- Python (in progress) and general IT fundamentals
- UI/UX design principles, including grid-based layout systems
- Version control, Markdown documentation, and self-directed technical learning

CERTIFICATIONS

To be added.
