

DAY MARINGISANWA

Software Developer

Harare, Zimbabwe | maringisanwaday@gmail.com

github.com/Day-void | linkedin.com/in/day-maringisanwa | day-maringisanwa-portfolio.onrender.com

PROFILE

Software developer who enjoys taking systems apart to understand how they work and where they fail, and who builds with that in mind: hashed admin logins, rate-limited forms and database-level protection against duplicate check-ins. Completing a software engineering bootcamp at Uncommon.org. Open to internships, junior roles and freelance work.

PROJECTS

OAK Zimbabwe Partner Gathering Platform

Team project | 2026

Next.js, TypeScript, Tailwind CSS, Supabase | oak-project-2.vercel.app

- Registration and attendance platform for the OAK Zimbabwe Partner Gathering: attendees register and receive a QR entry pass, and staff check them in by scanning it.
- Built the API routes, role-based route protection, admin authentication with hashed passwords, and duplicate-proof check-in enforced by a database constraint.

Shadow Coach

Solo project | In progress

React, MediaPipe, Groq API | github.com/Day-void/ShadowCoach

- Real-time AI fitness coach that tracks jabs, squats and slip/duck defense reps through the webcam, with live spoken coaching and an AI-generated workout routine.

To Do List Application

Solo class project

Python, JavaScript | to-do-app-qyst.onrender.com

- Responsive task management application with Python backend functionality and local storage for persisting tasks.

EXPERIENCE

Youth Coding Instructor

Primary schools in the community

- Taught coding fundamentals to primary-school learners, travelling from school to school in the community.
- Broke technical concepts into clear, accessible lessons and supported hands-on practice.

EDUCATION

Software Engineering Bootcamp, Uncommon.org

2026 - Present

Project-based bootcamp. Built the OAK Zimbabwe Partner Gathering platform as a team project.

SKILLS

Frontend: JavaScript, React, Vite, Next.js, TypeScript, Tailwind CSS, HTML & CSS, UI/UX design

Backend & data: Supabase (PostgreSQL), REST API routes, Python (learning)

Tools & workflow: Git & GitHub, Markdown documentation, MediaPipe, Groq API, EmailJS

CERTIFICATIONS

Uncommon.org Software Engineering Bootcamp: certificate on completion (in progress)
